

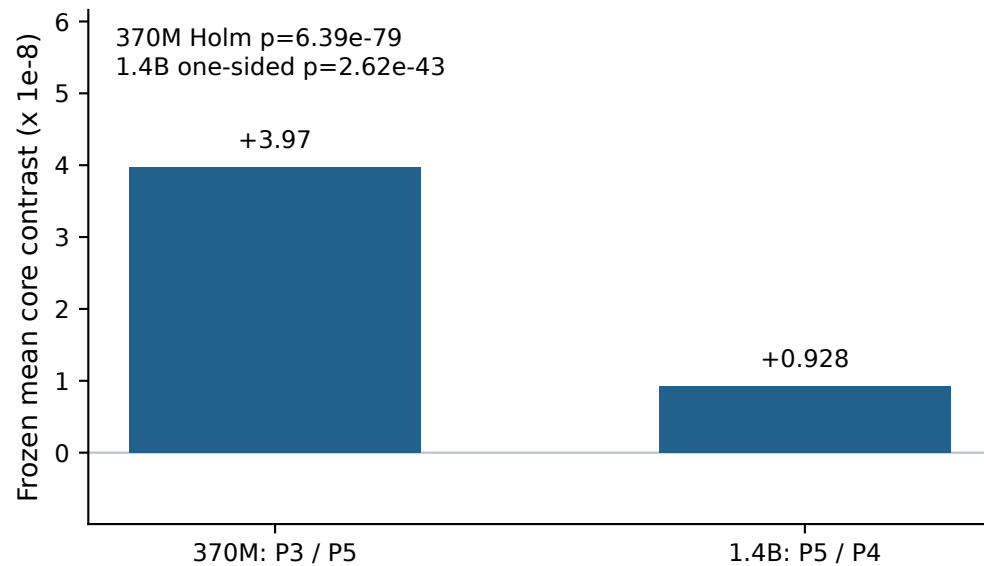

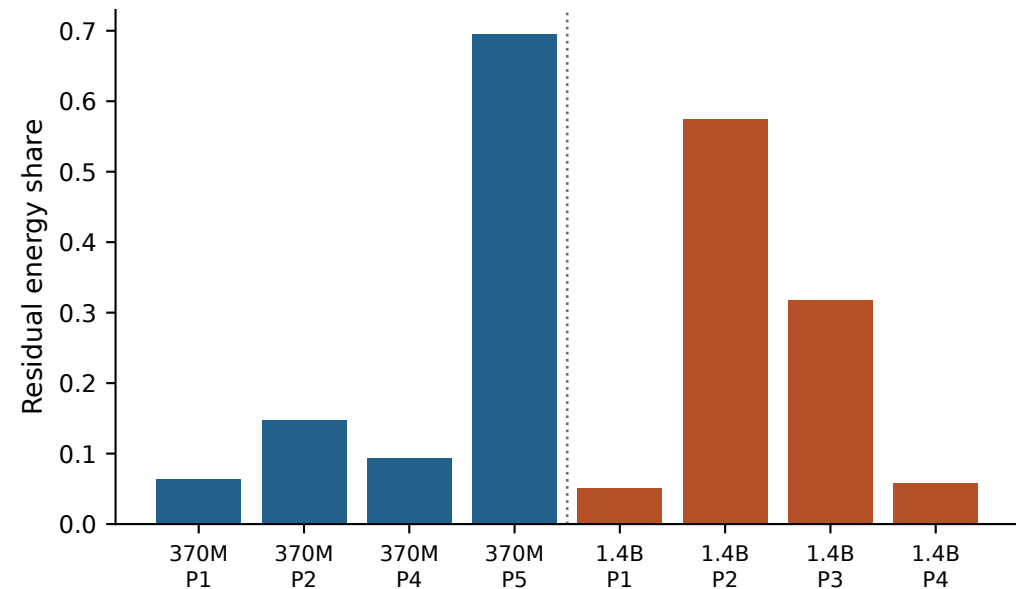

Figure 3 | CORE-STABLE / RESIDUAL-PLASTIC

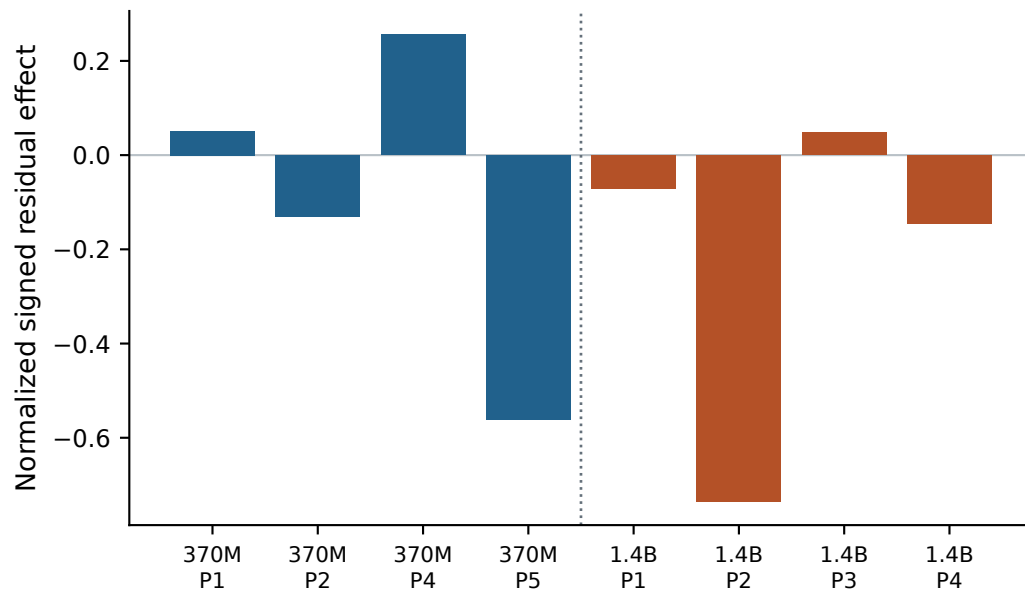

A CORE-STABLE | confirmatory

B RESIDUAL-PLASTIC | coefficient mass

C RESIDUAL-PLASTIC | signed effects

D Causal-role recurrence, local reorganization

Blue: 370M checkpoint-local ranks
Orange: 1.4B checkpoint-local ranks

Residual comparisons are descriptive.
No cross-scale significance test.
Same-numbered planes are not semantic matches.

130M context: residual mass concentrates in P1.
370M: P5; 1.4B: primarily P2, then P3.

Historical 370M joint residual criterion:
NOT ESTABLISHED; not rescued by core recurrence.
